Your Printing Supplies

This is the time of the year when you should get your Printing supplies for the season. We can supply you with all lines of Commercial Printing, such as Letter Heads, Envelopes, Bill Heads, Statements, Business Cards, or anything you may need.

Our prices are right and we guarantee satisfaction to our Customers.

When You Advertise In The Advance

You do so with the knowledge that you are reaching the people over the whole District. Not in many years have prices been so low on a vast number of merchandise items as at present. Buyers are eager to buy when they find bargains and the seller who advertises these bargains captures the buyers.

BUYERS' READ

The Chinook Advance

Brownlee To Go On Wheat Board

Announcement from Winnipeg that Premier J. E. Brownlee had been appointed to the Manitoba Wheat Pool Board was confirmed by the premier Saturday.

In explaining the dispatch Premier Brownlee said:

"The suggestion was made in consultations between the governments that one person should act as representing the three governments for safeguarding the provincial interests in the three pools."

"I have agreed to act in that capacity on the distinct understanding, however, that I should have the right to name an assistant who would do practically all the checking and investigating work and who would attend any meeting which I could not find time, in justice to my present duties, to attend."

"The pools did not object to this and I propose to arrange for a well qualified person who will do this work for me in keeping in such touch as necessary between the governments and the pools to immediately safeguard their securities."

Thackeray Items

Messrs Such, Morrison, Stuart and King have their crops in stack, awaiting the coming of the thresher. The Hager Arness outfit is expected this week.

Bill Potter met with an accident recently while cutting his crop. Going over some rough ground, he was thrown from the seat, falling upon his shoulder, sustaining injuries which necessitated a trip to Cerebral hospital. We are pleased to report that he is well again.

Messrs Leitch and Lucas gathered in their potato crop last week. The yield and size were very satisfactory, considering the dry season experienced.

Sig Haug has had the distinction of having two different combines working on his crop this year. After a trial he dispensed with their services, deciding to finish the balance with his binder.

No outside help was required this year, neighbors helping each other with the harvest work.

J. W. Lucas intends going to the Drumheller coal mines immediately after threshing. C. T. Leitch will hold the fort until spring.

Hand Over Income Tax

If the Dominion government would withdraw from the income tax field and give this source of revenue entirely to the provinces, provincial tax problems, and to a great extent those of municipalities, would be solved.

This was the opinion of Robert English, acting deputy minister of municipal affairs in the Alberta government, as expressed in a paper prepared by him and read to the Union of British Columbia Municipalities, Tuesday, by H. L. Seymour, director of town planning for Alberta.

Complimentary to Mrs. "Timmie" Butts of Calgary and her little twin son and daughter, Mrs. Oscar Nelson entertained at a baby party Saturday afternoon. Twelve little tots and their mothers were present and a jolly afternoon was spent. Mesdames Jacques, Richard Stewart, Nelson and Vanhook also entertained at tea during Mrs. Butts' visit here.

Discuss Relief Measures

Mr. R. English, deputy minister of municipal affairs, and Mr. A. A. McKenzie, superintendent of relief, department of municipal affairs, were in Chinook Monday and held a meeting with the various secretaries of municipal districts around, to discuss the matter of relief during the winter months. While little was made public, it is expected that measures will be made to supply the necessities of life at a small cost. The following municipal secretaries attended the meeting:

L. S. Dawson,	Collins M. D.
J. Rorabeck,	Cereal M. D.
W. Linklater,	Bertawan M. D.
D. Graham,	Acadia Valley M. D.
R. Green,	Golden Centre M. D.
J. E. McLeod,	Sounding Creek
R. Barton,	Richdale M. D.
Mr. Jensen,	Canmer M. D.
J. Norton,	Stewart M. D.

Old Resident Passes Away

The funeral took place on Tuesday afternoon to Chinook cemetery of Mrs. Eva McDuffee, who died at Innisfail on Saturday, September 12th, of heart trouble. Mrs. McDuffee was born in Michigan in 1862. She and her husband came to Alberta in 1913 and homesteaded near Atlee, where they resided till the death of Mr. McDuffee in 1925. Mrs. McDuffee had for some time resided with her son, Mutt McDuffee, in Innisfail. She had not been in the best of health for some years, but was taken quite ill about a month ago and passed away last Saturday.

"Grandma" McDuffee, as she was generally called, was of a loving disposition, and was beloved by all who knew her. She leaves to mourn her loss three daughters, Mrs. Fred Nelson of Atlee, Mrs. Frank Laphan of Markerville and Mrs. Lund of Michigan, and one son, Mott, of Innisfail, also two granddaughters one grandson and one great-grandson.

The remains were brought to Chinook Tuesday morning and the funeral service held in the United church was well attended by neighbors and friends, who gathered to pay their last respects to the departed. The service was conducted by the Rev. J. D. Woollett.

Mr. Waterhouse of Cerebral was in charge of the funeral arrangements. The pallbearers were: Messrs M. F. Sutor, M. Bjork, Pitcock, Don Robinson, F. McMillan and Bert Whaley.

Heavy Shipments Of Fruit

People in the prairie provinces are consuming more fruit than a year ago if the number of railway cars moving with this commodity from British Columbia and Ontario is any criterion.

Since the first of August Canadian National records show an increase each week in loadings destined for Edmonton, Calgary, Saskatoon, Regina, Winnipeg and smaller prairie towns. A number of cars with British Columbia fruit are also finding their way to eastern markets. Fruit growers in the Okanagan, this season, are experimenting in shipping apples by bulk as well as boxing them.

Miss Dodds, of Winnipeg, advance agent for Chautauqua, was in town Monday and Tuesday. Chautauqua is to be held in Chinook on October 6, 7, 8 and 9.

Alberta Pool Elevators Under Public License

Alberta Pool Elevators are now operated under public license.

This permits the Pool Elevators to buy or handle any grain. Pool Elevator facilities are not restricted to the handling of Pool members' grain only.

The reputation for fairness gained by Pool Elevators should be an inducement for all grain growers to patronize these elevators.

Any person delivering grain to Pool Elevators may sell his grain in any way he selects and at any time desired.

"SALADA" TEA

'Fresh from the gardens'

Courtesy and Safety

"Why is it," remarked the Observant Man, "that a man who may accidentally jostle you in a crowd, turns and says 'I'm sorry,' or 'I beg your pardon,' but who, when he gets behind the steering wheel of a motor car, throws all ideas of courtesy to the winds and acts as if you had no rights whatever, even the right to live?"

It is the unsolved puzzle of this present age. A man ordinarily polite and courteous, who if he bumped into another couple when dancing, or stepped on his partner's toes, would express his regrets, when engaged in motoring act, all too frequently, like an ignorant, uncouth boor. He who would hesitate to steal so much as a lead pencil from another, thinks nothing at all of stealing the right-of-way at a road intersection, even from a lady, considers he has done something smart, and even derides or joshes those whom he has made his victim. Yet he is guilty of theft, not only in a moral sense but actually in a legal sense, because the law declares it an offence to take the right-of-way from another to whom it belongs.

Many a motorist, who, if standing on his own two legs on the shore of a lake would never even entertain the thought of pushing a non-swimmer into deep water at the peril of his life, nevertheless does not hesitate to crowd a fellow motorist—possibly a beginner in the art of driving—off the road at the risk of smashing the other's car and possibly seriously injuring or killing him.

And why is it that so many men, ordinarily polite and courteous, refined in language and manners, become abusive, profane and quarrelsome over some slight mishap on the road? What is it about a motor car, or the pleasure or business of motoring, that so completely changes many men, and women, too, from their usual tenets of conduct into the most disagreeable creatures, reckless and regardless of the rights, comfort and safety of others?

Is it merely because the modern motor engenders such speed that the drivers of cars become reckless, heedless, and for the time being at least are no longer normal human beings? Or is it that peculiar quirk in our human makeup that seems to impel us to do what both commonsense and the law says we are not to do?

The conduct of not a few, but countless thousands of motorists is an unsolved mystery. No man, except he be a maniac, would think of throwing vitrol into another's face and thereby blinding him, but to anyone used to travelling on highways at night it would seem that the vast majority of motor car drivers think nothing at all of driving past approaching cars with powerful, glaring headlights completely blinding for the time being the drivers of those other cars, and inviting terrible disaster. Is it that they are just too lazy to be even bothered to dim their own lights for a few seconds? Or is it something else, some petty meanness of disposition, some un-understandable twist in their character which does not at other times display itself?

And yet courtesy is such a fine trait, a simple thing, something that costs nothing, but which is the hallmark of the true gentleman.

And how much pleasure it would add to motoring if courtesy, instead of a rude brutality, became the universal habit of the road! And, oh, how much it would add to the safety of the road!

Governments provide rules and regulations governing the condition of cars; Automobile clubs maintain educational campaigns of education; tests are provided for brakes, lamps, tires, steering gear, etc., and all serve very useful purposes. But a uniform, universal recognition and acceptance of the ordinary rules of courtesy by one toward another, and by each toward all, would do more than any one thing to obviate accidents with their present appalling bills for damages and irreparable loss of life.

As a nation we are striving with might and main and the expenditure of fabulous sums of money to combat tuberculosis, cancer, and dread diseases of one kind and another; we are engaged in conservation of our forests, our streams and water-powers, our fisheries, our minerals; we spend millions on research work to combat rust in wheat, grasshoppers, and other pests which destroy the proceeds of our agricultural labours,—yet we go blithely on taking human life recklessly, needlessly, maiming many more, and destroying millions of dollars worth of property annually through the agency of the automobile, which to many has become a dread and a menace when it ought to be a joy and a blessing.

And such a little thing, such a simple thing, as the practice of a uniform courtesy would serve to revolutionize the situation for the better. Why not try it for a change! Let a little courtesy do its good work.

Alberta Oil Wells

Fifty-Seven Million Dollars Expended In Drilling Operations

More than \$57,000,000 have been expended and more than a million feet of borings done in Alberta in the search for oil during the last thirty years, according to a recapitulation made by J. I. Carmichael, Lethbridge engineer. In all, some 407 wells have been drilled, not including the Ribstone field for which no details are available. Of the drilling done, 160 wells in Turner Valley have drilled 650,000 cubic feet—more than half of the province's total of 1,167,787 feet.

Hiking the Soft Way

We indorse enthusiastically the idea of the man who is crossing the continent in a wheel chair. We, too, have always felt that we should like to take a good, long hike, if we could do it sitting down.

White was the colour of royalty during some stages of Egypt's ancient history.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die. 'My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again. 'My other children also had diarrhoea at that time and I gave them 'Dr. Fowler's' with the same results."

Japan's Population

Is Increasing By Nearly a Million Every Year

One or two competent writers on Japan having announced lately with some confidence, that the population question in the Japanese Empire would settle itself because the rate of increase was steadily slowing down, the figures of the 1931 census now emerge to shatter that comfortable doctrine. The birth rate is not going down, it is going up. And the population is increasing at present by nearly a million every year. That fact may not be as disturbing to the rest of the world as it sounds. The Japanese, for all their apparent anti-emigration grounds, still show little desire to emigrate on any considerable scale. But the alternative is to convert Japan systematically from an agricultural into an industrial State.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from use. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted. "I was heart sick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen faster dyes to use than Diamond Dyes. They give the most beautiful colours—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do." Mrs. J.F.T., Montreal.

Preparing Relief Camps

Ontario Government Getting Plans In Shape For Unemployed

Payment of 30 cents an hour for an eight-hour day, with a deduction of 80 cents a day for board and 50 cents a month for medical services will be made to men employed in the relief camps being established in northern Ontario by the provincial government for the construction of the Trans-Canada Highway.

Official details of the administration of the camps were issued by Hon. William Finlayson, Minister of Lands and Forests. Present plans call for the camps into operation early in October.

There will be no military methods but provincial police will be available whenever required at the camps.

U.S. Increases Postal Rates

Rates To Canada and Great Britain Are Changed

New increased postage rates on United States letters and postcards mailed to foreign countries are now effective, the postoffice department announced. Changes on letters and postcards to Canada and Newfoundland was increased to three cents for letters and two cents for postcards. Rates to Great Britain, Northern Ireland and the Irish Free State were increased to five cents for letters and three cents for postcards. The new rate on airmail to Canada and Newfoundland is six cents for the first ounce and 10 cents for each additional ounce.

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

Has Tame Butter Filles

A Philadelphia man has developed what is said to be one of the finest collections of live butterflies in the United States. For many years Daniel G. V. Lanning has made a study of the beautifully coloured insects, raised them and tamed them. Now, he says, they will alight on his paper while he is reading and not move until he is ready to turn a page.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Disperses all roughness or chafing. Makes skin delightfully soft-textured. Every woman should use this priceless toilet requisite. Delicacy—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Bears Killing Alberta Cattle Right to shoot bears in Waterton Lakes National Park in southwestern Alberta, was sought by ranchers of the district. Cattle on ranches in the territory have been killed and carried within the park confines before ranchers were able to defend their cattle.

A newspaper man's son says that editors call themselves "we" so that the man who doesn't like the article will think there are too many people for him to tackle.

Workshops where blind men and women may earn a living are being established in Italy.

W. N. U. 100"

PUT HIM OFF HIS PIPE

Indigestion and Acidity

"A few months ago, I had an attack of indigestion, heartburn and acidity, and had no appetite for meals, especially breakfast. I am a pipe smoker, and for several days I felt so ill I could not even look at my pipe. I decided to try Knudsen Salts. A few days afterwards I found that the heartburn and acidity had gone, and for the last five or six weeks I have been in my usual good health. I can now enjoy my pipe-smoking, and in fact feel about 10 years younger."—R. P.

When your digestive juices fail to flow freely your food lies in the system and ferments, thus causing the distress of indigestion. The "little daily dose" of Knudsen first stimulates the flow of the gastric juices, and then ensures complete, regular and unalloyed elimination of all waste matter every day.

Woman Wins Air Derby

Aviatrix From Memphis, Tenn., Carries Off All Honours. Mrs. Phoebe Omile, of Memphis, Tenn., was officially announced as the winner of the transcontinental handi-cap derby from Santa Monica, Cal., after she had won a large share of the honours at the national air races.

The contest committees announced that Mrs. Omile had won the handi-cap race, in which 50 or more women and men competed, with a rating of 109.19 points. She won the grand prize as well as the prize for the women's division. D. C. Warren, of Alameda, Cal., won the men's division of the race with 103.5 points.

Bronze Statue Honours Hardy

Unveiled By Sir James Barrie At Dorchester, England

Unveiling a life-size bronze statue of Thomas Hardy, the work of Eric Kennington, here in Hardy's native Dorchester, Sir James Barrie, creator of "Peter Pan," told how nearly the world came to missing altogether the late novelist's services. "When the child Hardy was born," said Sir James, "the doctor thought him dead and dropped him into a basket. But a woman stepped forward to make sure and found he was alive. A statue to this woman—Mrs. Kennington could have done worse than give us that."

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range from the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Co-Operative Wool

Manitoba and Saskatchewan Shipments Reach High Figure

The Canadian Co-Operative Wool Growers' western branch, report the receipt during July of 552 lots of wool at Regina, and of 502 lots at Portage la Prairie; the total Manitoba receipts amount to 200,624 pounds, and Saskatchewan receipts about 333,000 pounds. Up to the end of July eleven cars have been shipped from Regina, seven from Portage la Prairie and one from Marchand. During the month four contracts were received from Manitoba sheepmen, covering 130 fleeces and thirteen contracts from Saskatchewan sheepmen covering 984 fleeces.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma a chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

High Quality Canadian Cattle Shipments of Canadian cattle to Great Britain have proven at times of such a high quality that the livestock sold on a par with Scottish home-bred beef according to John Byers, secretary of the council of Western Beef Producers. The Canadian cattle he added, at some periods, had been sold in preference to the Irish importations.

"Pop, he, Pop!" "Don't talk that way, Oswald, I'm in the grocery business, not a fountain clerk."

Plenty of Minard's well rubbed in soon sets your joints free. Rub with warm water before you go to bed.
You'll soon limber up!
MINARD'S LINIMENT
"KING OF PAIN"

Market For Canadian Apples

Big Campaign In France To Exploit Canadian Fruit

A consignment of more than a million Canadian apples soon, will be on sale in automatic vending machines on Paris boulevards, as the first step in a big campaign to make France eat Canadian fruit.

The final details of the campaign remain to be settled, but French importers already have made a cash offer for 7,500 boxes of Canadian apples, realizing their superiority over the French variety.

At the same time, negotiations are far advanced, whereby a Canadian company will install 2,000 vending machines along the boulevards. It is expected that each machine will sell 50 apples daily at one franc each, which is cheaper than the retail price of apples in Canada.

This enterprise is the result of the initiative of the Canadian trade commissioner's office, which also has just received the French Ministry of Agriculture's approval to concession to Canadian apple exporters allowing them to store their apples at Le Savre without paying the customs duty until the apples are sold.

This concession on the part of the French authorities will permit the holding of fortnightly sales of Canadian apples at Le Savre. It is expected that such sales will be started shortly.

Previously, consignments on which the customs duty had been paid, remained unsold at French ports, causing a heavy cash loss to Canadian apple growers.

Byng May Retire

Has Accomplished Task Of Police Reforms In London, England

According to the Daily Mail, Lord Byng, former governor-general of Canada, and now commissioner of the metropolitan police, intends to announce his retirement from the commissionership before the end of the year. The paper says Lord Byng feels he has accomplished the task of cleaning up the west end of London and the institution of police reforms which he had set for himself when accepting the appointment in 1928. He is now anxious to retire to his Essex home, the newspaper continues.

Sir Trevor Bigham, deputy commissioner, who married Lord Byng's secretary, is expected to succeed to the commissionership, the Daily Mail declared.

Barred From U.S.

William Shier, 48, who was returning to his home in Gary, Ind., after being two weeks at the bedside of his mother in Newmarket, Ont., has been refused re-entry into United States by United States immigration authorities. It is alleged that he entered the United States illegally seven years ago at Port of N.D.

"Matilda, won't you sing something for our guests?"

"Oh, I'd, dear, it is so late; and besides they are beginning to go."

"Yes, but not quickly enough."

A writer says that "one cat burglar will not betray another." A sort of fellow-feline, we suppose.

Children love it

Tell delicious flavor of Borden's Chocolate Malted Milk makes an irresistible appeal to youngsters. Its wonderfully good for them too. It makes easy eating on work or play and builds strong sturdy little bodies.

Many Years a Sailor

Earl Jellicoe Held Position Of Junior Officer In 1893

It seems ages ago in this whirling world since the disastrous collision in the Mediterranean between the "Victoria," flagship of the fleet, and the "Camperdown," and it is almost startling to recall that Earl Jellicoe, Canada's distinguished visitor, was a junior officer on the ill-fated "Victoria." Though stricken at the time with fever, he plunged into the sea and was among those rescued—in his case to give further distinguished service on another flagship of the fleet. Earl Jellicoe took to the sea when young, as the "Victoria" went down in June, 1893; and he is far from being an old man.

Want Child Marriage Back

Renewed attempts to abolish the Sarda Child Marriage Restraint Act forbidding marriage to children below the age of 14, have been made by Indian legislators. The authors contend that the Sarda Act constitutes an invasion of sacred religious customs of the Hindus, reaching back thousands of years and allowing children to be betrothed in marriage even in infancy.

The average farm in Belgium this year covers less than 15 acres. Much of the threshing in Belgium this season is being done by hand.

No Longer Bilinear—Thanks Vegetable Pills

"I suffered with biliousness for days at a time. Every medicine I tried failed to bring relief. . . the first dose of your wonderful Carter's Little Liver Pills gave me great relief."—Mrs. C. L. The Great Importance Of Experimental Farm Work In Fibre Crop Production In Canada

It would be very difficult to estimate in dollars and cents the value of the work done in Canada by the fibre crops division, which operates under the direction of the Dominion Experiment Farms System. The Division of Economic Fibre Production embraces work in a relatively large and varied field of endeavour and it is almost as directly connected with manufacturing activities as with cultural conditions.

There are some twenty projects under way at Ottawa in connection with problems that have confronted flax and hemp growers at various times. It is important to have an accurate record of the varieties best suited to the cultural and climatic conditions of Canada, and these records become more valuable as additional information is revealed from year to year.

The application of fertilizers best suited to these fibre plants offers a great field for careful investigation. This work is being carried on systematically at Ottawa as well as at a number of the branch farms extending from British Columbia to Nova Scotia, so that results may be analyzed, compared and recorded for future reference.

The central experimental farm at Ottawa is equipped with a modern flax mill in which flax and hemp preparing machinery of all kinds are given rigid tests. The farmer benefits from such a service because he knows that if the machinery he is interested in is given an unbiased and thorough test under government supervision, he will receive reliable information concerning it.

Then too, the fibre division of the central experimental farms system renders an extremely important marketing service.

During the year 1930 flax growing in eastern Canada received \$5.50 a bushel c.i.f. Belfast, Ireland for a special variety of flax seed known as J.W.S. This variety was originated by an Irishman named John W. Stewart, and was sent to Canada in 1928-29 for a test propagation by the Ministry of Agriculture for northern Ireland. During the year 1930-31 the price received for this special pedigree flax seed was \$4.68 per bushel.

The business end of these transactions was handled by the fibre division through the Ministry of Agriculture, northern Ireland and the seed was cleaned for the farmers and inspected free of charge by the Canadian Government. W. J. Megaw of the Ministry of Agriculture for northern Ireland stated in a letter received by the fibre division on the 20th of May, 1931, that "in counties Antrim and Derry the demand was largely for Canadian J.W.S."

This report is particularly gratifying in view of the fact that more than Canadian interests are bargaining for this market in Ireland.

During this past year farmers in the districts of Rhein, Saskatchewan, and Portage la Prairie, Manitoba, were given assistance in the handling of their respective hemp crops. This service was rendered in order to stimulate and encourage the establishment of a cordage industry in the west.

Also, this past year, a specialist was sent from Ottawa to British Columbia to carry on extensive experiments in the growing and handling of flax for fibre purposes. The results showed that flax from Columbia can produce a quality of fibre that compares very favourably with the best grades of Irish flax fibre.

Another service which has received favourable commendation is the installation of small demonstration flax mills in certain flax growing districts. These mills are equipped with a flax breaking machine and three or four scutching blades, as the case may be. The government supplies the machinery and the interested parties supply the accommodation and the power to run the machinery.

Hundreds of samples of the best fibre flax seed are mailed free of charge to farmers each year and applications for these samples is made to the fibre division from all parts of Canada.

When these facts have been duly considered one realizes the real value of experimental farms work in fibre crop production in Canada.

Ocean Travel De Luxe

All-Electric Kitchen Will Provide 12,000 Meals a Day On New Cunard

A wonderful all-electric kitchen, which will provide 12,000 meals a day, is being planned by the catering experts of the Cunard Line for the new 73,000-ton liner now being built at Clydebank.

The liner will carry over 3,000 passengers, 500 crew, and for the big task of feeding them 100 highly-paid chefs will be employed in the all-electric kitchen. The kitchen has many novel devices, including machines for keeping the ovens and grills at certain temperatures and instruments which wash thousands of plates and dishes in a few minutes. It will also be possible to cook simple dishes without attention.

The wine experts of the company have evolved new methods to ensure that all wines will be kept in perfect condition even though the liner may be running through heavy weather. Wines are purchased five years before they are used in Atlantic liners, and for years now the wines for the new Cunard's cellar have been waiting for the maiden voyage. The cellar will be one of the largest and best in the world.

Great progress is being made in the construction of the Cunard, the castings for the gear wheels and turbines, and the stern bracket, one of the largest ever made, are nearing completion at Darlington and Sheffield. Half the boiler installation is complete, and 1,000 miles of electric cable are ready for installation.

Bonds Of Empire

Earl Jellicoe Refers To Important Part Played By Canada

Great Britain is looking to Canada to provide a lead in strengthening the British Empire, declared Earl Jellicoe, president of the British Empire Service League, addressing an Empire Club luncheon at Toronto. Coupled with this remark was his confident assurance that Britain would surmount present difficulties and emerge successfully from the national crisis.

The Admiral of the Fleet recalled the feeling which existed in the Dominion in the '90's that Canada should separate from the Empire and throw in her lot with the United States. The Canada of today was sufficient answer to the fear that such feeling might ever lead to action.

The observation of Empire Day in Canada had developed from that feeling, he said. "It is well that our children should realize the common loyalty which binds the Empire; the tie of blood and the tie of respect and honor which we give to our king."

"Canada has played an immense part in the empire's work," Canada has fought in the common cause, and I have no doubt she would do it again. "We of the Mother Country will look to Canada to give us a lead in the strengthening of the ties of Empire."

Radium Not Cure-All

But Has Accomplished Much In Treatment Of Cancer

Cancer control was the greatest problem of health today, and radium had come to the fore as a potent agent. It was not a panacea, for even in skilled hands its results were often disappointing, but, on the whole, the world of medicine could look with satisfaction upon what it had already accomplished. Dr. Joseph Muir, famed New York cancer expert and physical therapist, stated in addressing the convention of the American Academy of Physical Therapy, held at Montreal.

Southern Alberta Wool

Shipments of wool from Southern Alberta to the Canadian Co-Operative Wool Growers' warehouse at Weston, Ont., have broken all records, according to a report issued by N. T. Macleod, secretary of the Southern Alberta Sheep Breeders' Association. Deliveries made to date aggregate 1,800,000 pounds, the wool clip being unusually heavy this year.

If a man listened to a continuous broadcast for a week the batteries would run down. . . . thank goodness!

FASHION

No. 129—Sports Model.—This style is designed in sizes 12, 14, 16, 18, 20 years, 36, 38 and 40 inches bust measure. Size 16 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 379 — Practical Model.—This style is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust measure. Size 16 requires 3 1/2 yards of 39-inch material for redingote and 2 1/2 yards of 39-inch material for the dress.

No. 505—For School Days.—This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 39-inch material with 1/2 yard of 27-inch contrasting and 6 1/2 yards of binding.

No. 520—Smart Day Model.—This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 39-inch material with 1/2 yard of 27-inch contrasting.

No. 754—For Wee Maids.—This style is designed in sizes 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

Norway Needs Our Wheat

Market For Canadian Wheat In Scandinavian Countries Says Commissioner

If Canada is willing to trade on a credit basis, she can cut out Russian wheat to a great extent in Norway, Frederick H. Palmer, Canadian Government Trade Commissioner to Norway, Sweden, Denmark and Finland, stated in Winnipeg recently. He said Canada and Russia each sell Norway about 1,000,000 bushels of wheat annually at present.

"Our wheat has a marked preference," said Mr. Palmer, "and if credit arrangements can be made, the wheat pool or any other exporter can, I think, get a good deal of business that is at present going to Russia. The Russians must have cash, and cannot, at present anyway, deal on a credit basis."

Trin exposed to extreme cold may crumble to dust.

It is far better to be sometimes deceived than to be always suspicious.

Boots Were Well Made

Missouri Man Has Worn Them Since "Civil War Days"

Jacobs Miller, 93 years old, Pleasant Hill, Mo., is wearing the same boots he had made here 73 years ago. John Hausworth, a bootmaker here in Civil War days made the boots for Miller and charged \$5 for them. According to relatives, Miller wore the boots at least once a week during a long period of years, and now that they are no longer his, "Sunday best," has been wearing them daily for the last four years. The original soles and heels are still used, but the original bright red tops have lost their brilliant colour.

Ship Horses To Montana

During a recent week sixteen carloads of horses, rounded up in the Medicine Hat district, were shipped to the Montana Horse Products Company at Butte. Mr. Chipman, who is buying for the Butte concern, was unable to estimate the coming requirements of his firm from Canadian territory, but the demand may run to 20,000 head.

Growing Habit Of Buying Empire Goods Gains Impetus In The United Kingdom

Wilkins' Trip Important

Only Way Certain Scientific Phenomena Can Be Obtained

Star dust on the bottom of the sea, among other scientific things, has drawn Sir Hubert Wilkins, submarine polar explorer, into great danger, in the opinion of Vilhjalmur Stefansson, who once led Sir Hubert on another polar trip.

Infrequently heard from, Sir Hubert is now in the great Arctic ice pack about 350 miles from the north pole, Mr. Stefansson said, "Sir Hubert undoubtedly cannot much longer delay his return from the ice because the summer season virtually is finished."

Mr. Stefansson emphasized the importance of Sir Hubert's trip explaining that in no other way can certain important scientific phenomena be obtained.

"Star dust is probably the most romantic of these phenomena. Scientists hold that dust from outer space is deposited in the polar regions in comparative purity, whereas in other parts of the world it is mixed with terrestrial dust. Obviously any samples that Sir Hubert can obtain from the bottom of the sea will be of use to science."

"Sir Hubert also seeks to weigh the earth from the north which is the shortest radius to the centre of the earth. The earth already has been weighed from the equator, where the radius is longest, and a comparison of the two weights will disclose important phenomena about, among other things, the mineral constitution of the earth."

"By use of the Sonic depth finder, Sir Hubert can make an almost unbroken contour map of the bottom of the Arctic sea. Sir Hubert also can observe water life in the Arctic sea as no other explorer could—by actually being under the surface where the life exists. He also can make important weather observations, investigate water temperatures and otherwise fill in the innumerable gaps that exist in our Arctic information."

"Probably three years will be needed for the completion of the work of the expedition."

How To Keep Milk

Keeping Milk In Proper Condition For Home Use

Four little words tell the whole story about how to keep milk in proper shape for use in the home. These are "Clean, Cool, and Covered." This is one of the fundamental rules of some economies to which the Dairy and Cold Storage Branch calls special attention. For best results milk should be served at the end of the meal, and it should always be sipped slowly. Milk is the ideal food for children of all ages because of its high quality and quantity of protein, its abundance of calcium, its readily assimilable phosphorus content, its iron and its easily digested fat and sugar.

Industrial Moose Jaw

Moose Jaw now has an industrial area of about 50 city blocks, the city council having set aside three subdivisions for the purpose—Prairie Heights, Westmore and Sunnyside. The area lies roughly between the main line of the Canadian Pacific and the Outlook line branch.

Time cannot remove kindly acts from a grateful heart.

Manitoba Wheat

Test Shows High Protein Content This Year

Dr. F. J. Bichel, of the research laboratory of the Canadian Board of Grain Commissioners, in a test made for protein content in the wheat crop of Manitoba, shows that the wheat crop of the province has a maximum of 18.3 per cent. as against a maximum of 14.6 per cent. last year and a minimum of 10.2 per cent. this year as compared with 8.4 per cent. last; the average being 12.25 per cent. against 11.5 per cent. in 1930. The test grains were taken from the same districts as last year.

Grain Grades High

Exceptionally High Quality Of This Year's Crop Is Noted

"Grain which has passed through the inspection department at Winnipeg in the last few days is of exceptionally high quality," it was stated by J. D. Fraser, chief grain inspector at Winnipeg. In a recent address before the officials of the World's Grain Exhibition and Conference at Regina. "A considerable amount has graded No. 1 hard; a great deal has gone No. 1 Northern, and some has graded No. 2 Northern on account of mixtures of durum and barley."

Records made by a "piano camera" show that a pianist does not strike all the notes of a chord at once, but uses from .01 to .37 seconds to complete the chord.

Education is first aid to finding out how little you really know.

Director (to chauffeur): "Why did Mr. Brown dismiss you after so many years' service?"
Chauffeur: "I had to drive his mother-in-law to the station and I arrived two minutes late."—Enn Rolff Half Timsa, Göttingen.

Here's a striking aerial view of the Sydney, Australia, harbour bridge, which has been seven years in construction, at a cost of nearly \$40,000,000. As the longest single span bridge in the world, it will carry four lines of vehicular traffic, two electric train tracks and two street car tracks, as well as two foot-bridges for pedestrians only. One million passengers will cross the bridge daily, it is estimated.

"Good morning, is your mistress at home?"
"No, I'm sorry, this is her day out."—Hummel, Hamburg.

Britain is now supplying bicycles to the whole world, except France.

"Yesterday I gave him the medicine, doctor, and the poor thing died last night."

"It doesn't matter; that medicine doesn't produce an effect till some months after."—Gutteriez, Madrid.

W. N. U. 1907

Saskatchewan's Cancer Campaign

Hon. Dr. Munroe Announces Opening of Radium Emanation Plant and Cancer Clinic

"Saskatchewan has the lowest death rate of Canadian provinces, and the lowest death rate from tuberculosis, cancer, diseases of the heart, pneumonia and automobile accidents. These statements of fact are based on Canadian Vital Statistics for 1930, recently released by the Dominion Bureau of Statistics. They demonstrate, unequivocally, Saskatchewan's leadership in matters pertaining to the health of its people.

While several factors have contributed to the spectacular showing of Saskatchewan in statistical records giving the comparative death rates of the various provinces and the Dominion, one that should not be overlooked is the very effective contribution made by the Saskatchewan Department of Public Health, presided over by Hon. F. D. Munroe, M.D., as Minister. The province is noted for its advanced health legislation, and its achievements in the campaign against tuberculosis are too well-known to require repetition. It was only to be expected, then, that when cancer started to claim particular attention as a "major killer," the first Saskatchewan should be the first province of Canada to tackle the disease as a public health problem.

The psychological opportunity came in 1929, with an exceptionally favourable combination of circumstances. The medical profession had surveyed the cancer situation and been seized of the necessity of intensive efforts being made to combat the cancer scourge. But someone was required to crystallize the thoughts and ideas of the medical men into action. That person presented himself in Hon. Dr. Munroe, who, having been elected to the Legislature as member for Moose, was elected Minister of the Department of Public Health in September, 1929, immediately grasped the chance and formulated a policy which gained the support and endorsement of the entire medical profession of the province.

The campaign against cancer, then, first conceived in 1929, was presented in tangible and actionable form in the 1930 session of the Legislature when Dr. Munroe, in his first session as Minister of Public Health, piloted the Saskatchewan Cancer Commission Act through the Legislature and was voted a sum of \$115,000 for the purchase of radium and equipment. In 1931, a further sum of \$30,000 was voted him for administrative purposes.

Pursuant to the Act, a permanent Saskatchewan Cancer Commission was appointed, the members being Hon. Dr. Munroe, Dr. David Low, Regina, and Dr. R. O. Davison, Director of the Communicable Diseases Division of the Department of Public Health. Drs. Munroe and Low are graduates of McGill University while Dr. Davison is a graduate of Toronto.

When the Commission settled to the gigantic task assigned to it, the first step was to determine the extent of the cancer problem. During the interim between application for, and actual purchase of radium, the Commission obtained access to the latest data in cancer research, and definite plans for the provincial campaign were formulated to the end that no undue delay would follow receipt of the radium and institution of the actual, clinical programme.

So well were the plans laid that, immediately a supply of radium was obtained, Hon. Dr. Munroe was in position to announce that one of the first emanation plants west of Montreal had been established at the University of Saskatchewan to supply clinics in the main centres with radium gas in "seeds" and other suitable containers, for treatment of cancer cases.

This emanation plant, it is stated, will not only produce sufficient seeds to meet provincial requirements, but will ultimately be the source of supply of provinces to the west.

The story of Saskatchewan's campaign is being told in the words of its author and sponsor, Hon. Dr. Munroe. "It was in June of last year, that I announced the personnel of the Saskatchewan Cancer Commission, and since their appointment, the members have been giving their attention to the various problems involved."

"It should be recognized that this Commission is not a temporary one, but a permanent body appointed to carry out the provisions of the Act, its functions including inquiry, education and treatment. We have been able to place an order for radium and are now in receipt of the first shipment which is in the form of radium chloride for use in the preparation of radon, or radium gas.

"In the outstanding clinics of the world, two methods of using radium in the treatment of cancer are considered valuable. One is the use of radium gas enclosed in suitable containers or "seeds," and the other is the use of radium salt enclosed in needles and tubes made of platinum. In Saskatchewan, we propose that both methods will be used, either separately or combined, as deemed advisable. We also are making provision for the use of high voltage X-rays, both alone and in combination with surgical treatment and radium therapy.

"It is recognized that cancer cannot be dealt with in a manner that will produce satisfactory results, unless early diagnosis and treatment are in the early stages of the disease. Consequently, with the co-operation of the medical profession, the Commission proposes to adopt an effective educational programme to facilitate early diagnosis and treatment. Cultivative diagnostic clinics are being established in two centres, in connection with treatment clinics and also in connection with existing general hospitals. It is believed that more satisfactory results will be obtained by such prophylactic than by having separate institutions for cancer cases.

"In addition to this, the programme in Saskatchewan will follow the line approved and endorsed by the outstanding authorities on cancer treatment. That is to say, instead of following the custom of the past of distributing radium supplies to physicians in all parts of the province upon requisition, the care of cancer patients will be confined to the established centres. This plan involves definite centralization of cancer treatment, and is based on the experience of other places which is, that cancer requires expert treatment and experienced care if adequate results are to be obtained.

"Cancer is, as a rule, a progressive condition, and the centralization of cases will be of distinct value to the patients, permitting, as it does, periodic re-examination under expert supervision, and prompt treatment of recurrences or metastases. Such a procedure also will be of definite value to us in carrying out provisions of the Act, by enabling us to follow the cases, receive treatment in order that complete and detailed statistical records may be compiled which, later, will serve as a guide in arriving at, and assessing the value of, the procedure used. This following-up of cases, with compilation of the data obtained, will be essential in providing the citizens of Saskatchewan with the most effective known treatment of the disease.

Referring to Saskatchewan's outstanding record as shown in comparative vital statistics, Hon. Dr. Munroe said: "Saskatchewan is situated very favourably in comparison with other provinces of Canada and states of the American Union. Saskatchewan's death rate from cancer in 1928 was 55.2 per 100,000 population, whereas the other provinces and states recorded a rate in excess of 100. But those figures do not tell the whole story in this province. In 1905, the death

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: Captain Jimmy is trying to jump with the Chinese on the island. They run out of gasoline and are forced to land on a deserted island in the Chinese Sea.

After our adventure with the shark, we climbed up to the high rock that stood in the centre of the little desert island. Here we lit a roaring fire, in hope that some passing bird would see us.

All night we kept it blazing but morning broke grey and cold without a sign of smoke or life. On the horizon, after daylight, we saw a great mass of white smoke went up to the clouds like a giant hand.

Great smooth swells came in from the open water, rose and crashed with a dull boom against the rocks but apart from the sound of the waves, our island seemed dead. Sometimes we find our way out of a jam, but I don't know how we could have shrouded all at the top of the mountain.

On the first day we kept the smoke going, but on the second day after night we were increasing at an amazing rate. We almost ran out of fuel.

NOTE—Any of our young readers writing to "Captain Jimmy," 2010 Star Street, Toronto, will receive his signed photo free, send a note.

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. . . . Pound and half pound tins at your grocers

rate from cancer was only 8.8, whereas in 1919, it was 33.1 per 100,000. Thus it can be seen that cancer deaths are increasing at an alarming rate.

In the ten-year period prior to 1928, the cancer deaths per 1,000 deaths from all causes in Saskatchewan, increased from 38.3 in 1919, to 78.2 in 1928. That means the rate has practically doubled in that period.

In conclusion, the Minister of Public Health said: "Cancer is a disease of the adult and later life span. In Saskatchewan the percentage of living persons over 40 years of age is smaller than in the other provinces. Consequently, the present appears to be the opportune time to begin operations against the cancer scourge, by making suitable preparations to provide the citizens of this province with the latest and most approved methods available of cancer treatment."

Under Communism Every Farmer and His Family Would Be Virtually Slaves

If the Communists had their way, no farmer would own his own farm, and every farmer with his wife, his sons and his daughters would become the servants of the directors of the people, and virtually slaves. Civilization would be turned back two thousand years and the liberty for which our fathers fought would be lost.

These fanatics do not preach robbery of the rich man alone, but poor man also. But none of these would suffer down from his high place as a farmer and become a cowering peasant would be humiliation indeed.

SASKATCHEWAN CANCER COMMISSION

HON. F. D. MUNROE, M.D., G.M., author and sponsor of the Saskatchewan Cancer Commission Act, a native of Glenora, Quebec, and a graduate of McGill University, was elected member of the Saskatchewan Legislature for Moosemin in 1929. He was appointed Minister of Public Health in September of that year, upon accession to office of the present government. Hon. Dr. Munroe immediately applied himself to the cancer problem, his efforts resulting in passing the Saskatchewan Cancer Commission Act in 1930. He has been active within the short space of five months. This, he admits, was made possible by the wholehearted support given him by members of the medical profession, irrespective of political affiliation. Hon. Dr. Munroe also inaugurated the Saskatchewan mental health programme.

DAVID LOW, M.D., C.M., was born at Bainsford, Scotland, in 1868, and came to Canada in 1870. Educated in the public and high schools of Ontario, he graduated from McGill University in 1889, and for some time was house surgeon in Montreal general hospital. In 1890 he commenced practice in Regina and from 1894 to 1901, was medical health officer for the city. Dr. Low was active in the establishment of the Saskatchewan Medical Association, and was chairman of the committee of the Canadian Medical Association which drafted the constitution which the Royal College of Physicians and Surgeons of Canada is founded.

R. O. DAVISON, M.D., was born at Brantford, Ont. in 1885, and, receiving his early education in the public and high schools of his native city, later entered the University of Toronto from which he was graduated in 1908. Dr. Davison was appointed medical inspector in the Saskatchewan Department of Public Health in 1921 and, when the Division of Communicable Diseases was organized, in 1923, became its first director. When Hon. Dr. Munroe decided to institute a programme to deal with the cancer problem, Dr. Davison was placed in charge of the work as Director of Cancer Service. He has been active in medical circles since coming to Regina and, in 1920, was president of the Regina and District Medical Society.

Hunt For Hidden Treasure

Sir Malcolm Campbell Said To Be Interested In Cocos Island Quest To Be Sir Malcolm Campbell, world auto mobile speed king, has joined J. E. Leckie, of Vancouver, in his enterprise to head an expedition this year to search for hidden treasure on Cocos Island. He has accepted an active directorship in the company which will finance the Leckie Expedition, states Col. Leckie.

Sir Malcolm is not unacquainted with Cocos Island and its alluring history. In 1926, he spent some time there hunting treasure. His party was poorly equipped, however, according to his own admission, and was not successful.

Recently the British speed king opened negotiations with the Costa Rica Government, which owns Cocos Island, for a concession to again hunt treasure there. The Vancouver commission, he has already obtained the concession, the result being that Sir Malcolm has taken an interest and a directorship in the company.

THE RHYMING OPTIMIST By Aline Michaels

BEGINNING AGAIN

This is the joy each morning brings, The joy the happy sun brings. As ringing through his glad refrain I catch the words, "Begin again!" Dawn brings lost courage back anew, Brave dreams once more are coming true.

My breast reiterates the note Morn wakens in the linnet's throat. "Begin again and never fear," I hear the valiant voice of cheer,

"Begin again and know but this: Man's life's a chalice shaped for bliss!"

No failure now can touch my days, No loss cast shadows on my ways, I have forgotten doubt and pain In challenge of this brave refrain.

"Begin again, begin anew, Be sure your dreams are coming true; Forget the past and know but this: Man's life's a chalice formed for bliss!"

Louisiana leads the United States in quantity production of furs.

"I wanted to ask you if you could use a barometer?" "Can I see it?" "It's it—I have well-functioning rheumatism."—Lustige Blaetter, Berlin.

HEAVY TAXATION WILL BALANCE BRITISH BUDGET

London, Eng.—With axe and tax Rt. Hon. Philip Snowden, Chancellor of the Exchequer, balanced the British budget. It was eminently a budget of national sacrifice. Its wide-spread net was flung over rich and poor alike.

It caught the drawer of the dole with a 10 per cent. reduction in benefits. It hit the insured worker with a demand for increased contributions. It cut school teachers' salaries 15-per cent. It hit police, recruit and defence services, cut the salaries of members of the government and members of parliament and judges on the bench. It raised the income tax 12 cents on \$5.

The standard income tax rate will now be \$1.25 to \$5. It reduces income tax exemption of both married and single. It adds 10 per cent. to the super-tax; it imposes higher duties on beer, tobacco, snuff, petrol. It brings even the lowest priced entertainment within its sweep. Even the nickel show now pays a one-cent tax.

"This is one of the most disagreeable tasks that has ever fallen to me in my life," said Mr. Snowden, as he opened his statement. "It is no pleasure to call upon people to make sacrifices or bear additional burdens and only the consciousness that this sacrifice is necessary; that these burdens are necessary to avert far greater burdens makes my task this afternoon tolerable."

Before Mr. Snowden rose painfully from his seat the House had been in a hubbub with rapid fire questions. As minister after minister was called to answer, the Labourites ironically cheered. It was from the Liberals and Conservatives who packed the government benches behind him that Mr. Snowden received applause such as few chancellors receive. The defiant challenge of his final sentence, "Come the world against us, England yet shall stand," brought them crowding to the front bench to offer congratulations.

It was a grave story he told—the estimated deficit this year was \$370,000,000, and next year \$850,000,000. "The country must face up to its position," Mr. Snowden exclaimed as he drummed his dispatch box with nervous fingers. "And I am going to do it this afternoon. There must be no more borrowing for the payment of unemployment benefits when the present borrowing powers were exhausted, he said.

He proposed to reduce the debt sinking fund appropriation both this year and next from \$250,000,000 to \$162,500,000. Deficits he proposed to meet in this way:

Economies in expenditure	\$110,000,000
Savings on debt redemption	68,500,000
Taxation, inland revenue	145,000,000
Customs and excise increases	57,500,000
Total increase	381,000,000
Old estimated deficit	373,395,000
New estimated surplus	7,605,000

Canada Favours Arbitration

Would Support Principle Minister of Justice Tells League

Geneva, Switzerland.—Canada's support for the principle of "arbitration, security and disarmament" the French formula—was announced to the assembly of the League of Nations by Hon. Hugh Guthrie, Canadian delegate, who is making his first appearance at Geneva. He is Canada's Minister of Justice.

This support, he said, would be in the nature of sympathetic co-operation in whatever plan may finally be agreed upon.

Canada is in no wise a militaristic nation and Canada's armaments are practically negligible, he said.

Tentative Date For Radio Hearing
Ottawa, Ont.—About December 10 is the tentative date for the hearing of the radio reference before the Judicial committee of the Privy Council in England, according to latest official information received. The reference is on the question of the respective rights of the Dominion and the Provinces on radio broadcasting and receiving.

Boat Clears For Scotland

Port Arthur, Ont.—The freighter "Dewstone" of the Newfoundland-Halifax Transportation Company cleared from Port Arthur recently for Aberdeen, Scotland, with 1,600 tons of flour. This is the first boat this year to leave Port Arthur with a cargo direct for overseas. One boat left here for the Atlantic trip last year.

DRASTIC ECONOMIES

Rt. Hon. P. Snowden, Chancellor of the Exchequer in the British National Government, whose budget speech gave details of new taxation.

ANOTHER CIVIL WAR IN CHINA IS IN PROSPECT

Shanghai, China.—Only one month of peace has elapsed since the ill-fated rebellion of General Shih Yisan was crushed in the north, but China is gearing herself for another civil war. With the Cantonese invasion of Hunan Province confirmed, Nanking, while repeatedly professing a desire for peace, is energetically preparing for conflict.

Meanwhile the national flood relief commission approved the \$70,000,000 Mexican (about \$21,000,000 gold) program of Finance Minister T. V. Soong for the relief of China's destitute millions.

The activities of Chiang Kai-Shek, president of the Nationalist regime and commander of its armies, indicate he is preparing to strike swiftly and with the most formidable weapons at his command in the hope of cracking the insurgent forces before they penetrate far into Hunan.

Military experts expressed the belief that the Hunan struggle would be swift and sanguinary, since the armies of both sides rank highest among all the Chinese in offensive qualities.

State Hospitals

Hospitals Maintained By The State Visualized For The Future

Victoria, B.C.—Hospitals maintained by the state was a visualization of the future given by Hon. S. L. Howe, provincial secretary, at the opening of the fourteenth annual convention of the British Columbia Hospitals' Association.

"I am of the opinion that the time will come when the health of the people will be a state obligation," said Mr. Howe.

Fewer War Victims

Berlin, Germany.—The number of German war victims shows a decrease this year for the first time since the war. The total of those, including widows of veterans, who had been in one way or another afflicted increased until last year, when the total was 840,000. This year it dropped to 838,360.

Store Grain In North

Report States That Two Million Bushels Will Be Stored At Churchill This Winter

Churchill, Man.—More than 2,000,000 bushels of grain from the Canadian west will be stored at Churchill's new elevator this fall and winter to relieve the elevator facilities at the lakehead, and to prepare for shipments of grain over the bay route next spring, according to semi-official reports here. Definite decision on the project will be reached if the two ships taking part in the movement of grain from the bay this month reach their European ports successfully.

The project is finding much favour among officials of the Hudson Bay Railway because it means train crews and staffs would be kept on at work until well on into the winter instead of being laid off in a few weeks. As well as aiding in the movement of wheat in the west the plan would make a test of the bay elevator under the rigorous winter conditions of the Hudson Bay. Many claim the north climate will affect grain in storage here.

The most of the grain will come from the Saskatchewan district but some of it will be from southern Saskatchewan, Moose Jaw, and Regina, if the Government decides in favour of the scheme.

Bonds Over Subscribed

C.N.R. Twenty Year 4½ Per Cent. Bonds Picked Up Quickly

New York.—Wide-spread demand for the Canadian National Railway Company 20-year guaranteed 4½ per cent. bonds, offered recently, resulted in subscriptions in excess of the initial \$25,000,000 offering and an additional \$25,000,000 of the bonds which the banking syndicate had under option. Accordingly, the closing of books on the entire authorized issue of \$50,000,000 was announced.

The heavy oversubscription of the issue was attributed to the recent scarcity of high grade bond offerings as well as to the attractiveness of the bonds, which carry the unconditional guaranty of the government of the Dominion of Canada.

Police Radio

Alberta Provincial Police Radio Network Is Extended

Edmonton, Alberta.—Alberta provincial police radio network will be extended within the next fortnight with the erection of broadcasting and receiving units at Grande Prairie and Peace River. The additions bring the A.P.P. broadcasting units to five, extending from the northern points to Lethbridge.

Announcement of the extension was made by Commissioner W. C. Bryan, head of the force.

Mexico Will Join League

Mexico City.—Mexico's acceptance of the invitation to join the League of Nations has been called to Geneva by Foreign Minister Gerardo Estrada. The proposal must also come before the senate for ratification inasmuch as membership in the league implies adherence to the covenant and the Treaty of Versailles.

Saskatchewan Horses Win

Toronto, Ont.—George T. Fraser, of Tate, Sask., took prizes for the best mare any age, and best mare three-year-old and over in the Percheron judging at the Canadian National Exhibition.

HEADS LEGIONNAIRES

Major John S. Roper, who became President of the Canadian Legion of the British Empire Service League when Lieut.-Col. LaFleche retired, was re-elected to the important post when members of the Legion from all parts of the Dominion gathered in Toronto.

Arctic Trip Ended

Wilkins Making Preparation For Early Return To America

Longyear City, Spitzbergen.—Sir Hubert Wilkins is overhauling and refuelling the submarine "Nautilus" in preparation for an early return to America, either direct or by way of Iceland.

The chief damage done on his cruise into the Arctic was the breaking of the mast by a violent storm. The radio apparatus also was harmed but repaired on the way back. The party expressed satisfaction with the working of its scientific instruments, especially the gyro-compass.

Members of the crew, bearded and dirty, but smiling, headed for steam baths on arrival. They said that during the southward trip from Spitzbergen the vessel rolled more than at any time since they left the United States, and that some of them were seasick.

Trans-Canada Telephone

System Expected To Be Completed By December 1

Edmonton, Alberta.—The trans-Canada telephone system is expected to be completed by December 1, according to Hon. V. W. Smith, Alberta Minister of Telephones, who returned recently from the Telephone Association of Canada meeting at Mipaki, Ont. The Alberta link from Calgary east is finished and work on the western section from Calgary to the British Columbia boundary will be ended by the last of November, he said.

Suggest New Title

Capetown, South Africa.—"That the king's title be known in the Union of South Africa as George I. of South Africa and not George V. of Great Britain," is the resolution to be submitted to the Nationalist Party Congress by its Reitz branch, it was made known here. The branch holds this innovation justified on the ground South Africa obtained its independence in 1926.

Will Use Canadian Fuel

Winnipeg, Man.—Use of Canadian fuel has been decided upon by the Winnipeg School Board. Orders for 55,000 tons have been placed, 45,000 tons from Alberta, and 10,000 tons from British Columbia mines.

German Fleet Below Limit

Could Have Twice As Many Ships Under Versailles Treaty

Geneva, Switzerland.—Germany's arms statement showing an army of 100,500 men and 4,500 officers is published by the League of Nations secretariat.

Foreign Minister Julius Curtius in a foreword said that Germany had not yet been able to build her fleet up to the limit laid down in the Versailles treaty and that the report revealed "how meagre Germany's armament is compared with other states of corresponding territory and population."

"The navy possesses for example only four commissioned ships of the line, whereas according to Article 181 of the Versailles treaty and the regulations of the Inter-Allied maritime control commission six ships of the line should be in service and two ships of the line in reserve, in other words twice as many."

Will Continue Aid In West

United Church Of Canada Pledges Relief For Saskatchewan

Montreal, Que.—A new challenge to the Christian Church existed in the fact that "complete and extensive disaster has befallen the people of 40,000 square miles of southern Saskatchewan," Rev. William Munro, D.D., secretary, declared in addressing members of the United Church of Canada, Montreal presidency, here.

The Presbytery appointed a special committee to aid the central body of the church in gathering and forwarding clothing and other relief material to the stricken community. It was emphatically stated that the church would stand behind its missionary work in Saskatchewan so that the ministry there would be fully maintained.

LATE ESTIMATE OF THE WESTERN WHEAT CROP

Ottawa, Ont.—The wheat crop in the three prairie provinces is estimated at 246,400,000 bushels, in a crop report issued by the Dominion Bureau of Statistics. This is substantially below the crop of 374,500,000 bushels in 1930. While there are bumper crops in central Alberta, there is a complete failure in some southern regions of the prairie provinces. Higher wheat production is forecast in Alberta than in Saskatchewan, despite the fact that the seed acreage in Alberta was only half that in the other province.

"If the provincial estimates are justified by the out-turn it will be the first time that Alberta has been the leading wheat-producing province," according to the report.

The total estimated yields of all the small grain crops, except fall wheat, are lower in 1931 than in 1930. In the maritime provinces, yields are generally higher than in 1930. The grain harvest has proceeded under particularly favourable weather conditions, giving promise of high quality.

"The western wheatfields held very little reserve moisture at seeding time," the report says, "so that crop growth was dependent on the rains of the growing season. These were distinctly limited and late in a somewhat triangular area bordered on the east by Brandon, Manitoba, and on the west by Medicine Hat, Alberta, and attaining its greatest width in central Saskatchewan. The eastern and northern parts of Manitoba, most of northern Saskatchewan, and western, central and northern Alberta were favoured with greater precipitation, although this came too late to make really heavy crops in many districts."

"Freshing is about two weeks behind last year but, with excellent weather prevailing, has reached good proportions in southern regions and in the Peace River district. The quality of the crop promises to be high, although there will be shrunken kernels in the south and some starchiness in the regions of high yields. The market movement of the new crop is very tardy."

"Generally speaking, the wheat crop again proved its ability to withstand adverse drought conditions better than the other small grains. The proportional reduction in wheat yield from 1930 is much less than in barley, rye and flaxseed, with the barley crop of 1931 estimated at less than half that of 1930, and the rye crop little more than one quarter."

FOUR MAROONED SAILORS RESCUED IN FAR NORTH

Ottawa, Ont.—The rescue of four Scottish castaways, marooned for many months on the shores of Froisher Bay, the deep inlet which cuts into the south-eastern portion of Baffin Land, has been effected by the S.S. Beothic, the steamer chartered annually by the Canadian Government to carry supplies to the far northern outposts of the Arctic Circle.

The names of the castaways and of their small motor ketch which, a year ago, was dashed to pieces on the coast of the inlet, could not be ascertained from the brief wireless messages received from the "Beothic" Thursday, Sept. 10. Such meagre information filtering through from the sub-Arctic, however, conveys that they were men from the little fishing town of Peterhead, in the north of Scotland.

Last summer, according to the radio despatches, an intrepid quintette inspired by the prospect of riches to be gained in the fur trade of the Arctic, left the Scottish port in a small motor ketch. What fortune befell them is not known, but the fact that the shipper of the diminutive trading vessel did indicates that mishaps were not foreign to them.

One of the four took the place of the dead man and ventured the ascent of Froisher Bay. There the intrepid fur traders met their crowning misfortune. Their motor failed, and helplessly they were buffeted about among the ice floes until finally the vessel was dashed to pieces on the rocks. All four were able to reach land.

A touch of good fortune came to them in their discovering an abandoned Eskimo camp and, adding the new supplies they had been able to salvage to the walrus meat found there, they eked out a precarious existence.

Last December, however, their plight became desperate. The rigors of the Arctic winter, combined with their total lack of nourishing food brought the four men to death's door. But again the gods of chance were with them, for as they were on the fringe of complete exhaustion they were found by a wandering band of Eskimos.

The natives fed them, tended them, and at length conveyed the four to the post of the four men to death's door. The four men were taken to the Royal Canadian Mounted Police at Lake Harbour. There the men were well cared for, installed in warm comfortable quarters, and provided with sustenance that rebuilt them. When the "Beothic" put into Lake Harbour 10 days ago, the four castaways were taken aboard and now en route to North Sydney, N.S.

To Assist Agriculture

Formation Of A National Agricultural Council Is Recommended

Regina, Sask.—The formation of a National Agriculture Council whose functions would include a thorough and continuous study of agricultural policy and the marketing possibilities in Canada and foreign countries, was approved by the agricultural committee of the Canadian Chamber of Commerce here.

The action of the agricultural committee followed a day devoted to a discussion on "what is a sound policy for Canadian agriculture."

Premier J. E. Brownlee of Alberta, and a number of noted agricultural authorities all told of the difficulties confronting the farmer of today. Though none of the speakers attempted to define a cure for the situation all agreed that the agricultural situation demanded the fullest support of the business and industrial class.

Plans for a lower rate of credit for farmers was made by Premier Brownlee. There was something in this direction needed if Canada was to avoid a far more serious situation, he said.

The feeding of lower class grain to cattle, to produce first class livestock and dairy products instead of the farmer accepting a mere recognition for his grain on the foreign market; a body to help the farmer market his products and a decrease in farm production, were suggested as means of helping Canadian farmers out of the present situation.

Will Leave For France

Winnipeg, Man.—Chief of Police Chris H. Newton, of Winnipeg's police force, has been appointed vice-president of the International Police Conference which is to be held in Paris, France, September 28. Word of his appointment was received from New York, and he will leave for the meeting within a few days.

WHEN ENGLAND MET A CRISIS—AND WON

Here is a general view of the large crowd of Britishers which gathered in Downing Street, London, in which the Prime Minister has his official residence, to see what would follow following the downfall of the British Labour Government. When Ramsay MacDonald (right) left No. 10 Downing Street for Buckingham Palace, to confer with King George about the formation of the National Emergency Government, he was enthusiastically cheered by the great throng.

Important Medical Discoveries

Use Of Hormones Has Produced Some Remarkable Results

Records of a girl saved from dwarfism, of insane persons cured by hormones, and the discovery that sugar can be fed to diabetics were reported to an endocrine symposium of the American Chemical Society at Buffalo recently.

Endocrines are the ductless glands whose secretions, the hormones, are held by some scientists to account for the differences between races. They govern to quite an extent height, slenderness or breadth, length of arms and legs, shape of face, quality of voice, distribution of hair or of fat on the body, possibly skin pigment, masculine characteristics in women such as deep voice, beard and masculine features, and even the emotions.

Chemists have been isolating hormones for several years. Their application to human health has been difficult, but some of the leaders of the medical profession reported on progress.

A girl who stopped growing at six was described by William Englebach, M.D., of New York City. A growth hormone, extracted from the pituitary gland of animals, was given to make up for a deficiency in secretion from the girl's own pituitary.

In less than two years she grew nearly three inches. The circumference of her head increased six inches. Her weight rose 7½ pounds.

Dr. Englebach said the general medical profession has obtained growth hormones because of difficulties about purifying them. He predicted these hormones will be available soon; and with them another from the same gland that will control sex development.

Insulin, the hormone which relieves diabetes, is supplemented by diet discoveries at Montreal General Hospital, described by Dr. L. M. Rabinovitch, who said:

"Provided the fat content of the diet is kept at a very low level, it has been found that diabetics can, according to the severity of the disease, tolerate what have hitherto been regarded as impossibly large amounts of carbohydrates (sugar) without the aid of insulin. We now have over 500 patients on these diets."

Progress In Electrical Development

Head Of Party Of French Electrical Engineers Sees Big Future For Canada

Charles Malegrotto, president of La Cle Parisienne de Distribution d'Electricite, and head of the party of French electrical engineers, which arrived in Canada aboard the "Empress of Britain" recently, is of the opinion that Canada will see remarkable development in the field of electricity in the future. In the course of an interview at Quebec, M. Malegrotto said:

"Although some of the best and most modern electrical plants in the world today are to be found in Canada, I am of the opinion that what the Dominion has seen accomplished in this field in the past, is nothing compared to electrical development which Canada will witness in the future. The factor of electrical utilization will always be much higher in Canada than in countries like France, because the Dominion possesses immense industrial organizations, such as pulp and paper mills, which need a tremendous amount of electrical energy, the whole year round, a situation which is the exception in a country like our own."

Nursery Stock Shipped East

A British Columbia farm has secured an order for nursery stock of 15,000 plants from a large firm in Eastern Canada. The order includes ferns, aspidistras, palms, dracenas and crotons, says the market news letter of the Department of Agriculture.

For Boys' Calf Clubs

Twenty-eight Ayrshire heifer calves have been supplied by the Consolidated Mining and Smelting Company's farm at Trail this year for boys' heifer calf clubs.

"Would you care to lend five pounds to a friend?"

"I should like to, but, unfortunately, I haven't a friend in the world."

Buen Humor, Madrid.

W. N. O. 1007

China Needs Sympathy Of Civilized World

Recent Floods Are Greatest Catastrophe In Nation's History

Although China always seems to be prostrated under one calamity or another, the flood in the central Yangtze Valley is a new and different catastrophe, already outstripping all recorded precedent, and has therefore come down upon the dense population of a great, rich area comparable in many ways to the upper Mississippi Valley and taken it wholly off its guard.

The Yangtze River is a relatively well-behaved Chinese stream. Its volume varies generally from mid-winter to mid-summer, when melting Tibetan snows often raise it 100 feet above low-water mark in Szechuan and forty-odd feet at Hankow, but it has seldom in the past varied enough from its averages to catch the communities along its main course unprepared. Unlike the rivers of the northern plain, its course is sharply defined by almost continuous lines of hills from source to estuary. For more than 2,000 miles in Tibet and western China it flows through deep gorges, emerging at Ichang for a sedate flow of 1,000 miles to the sea down a valley seldom 100 miles wide. The bed is everywhere deep enough below the valley floor to carry a great surplus volume of water, and where farms and villages descend into it dikes have been built that have always been sufficient protection against normal summer floods. So the Yangtze does not cut the same ominous suture in Chinese tradition as the Yellow River. The only explanation of the present calamity is that this year's body of flood water has simply transcended all experience and that the dikes have disappeared under its pressure.

There is no way of estimating the damage that is being done and there is certainly no language that can convey an idea of the human misery that will follow. The sum of wretchedness will dwarf anything that the Occident has experienced in its history and will be this winter's greatest claim to the sympathy of the whole civilized world.

Britisher Likes New Things

Knows Less About London's Antiquities Than American Visitor

The ordinary American visitor in London has a better acquaintance with the city's antiquities than nine-tenths of the Londoners of the same order of intelligence and education. The Britisher is more interested in the Empire's far-flung colonial possessions—Kenya, India, Africa, Ceylon, Egypt, Australia. He likes to hear about new enterprise. At the drop of a hat he will turn his back on every storied ruin and animated bust in the whole collection and travel half round the globe to make his home in a lonely, pestiferous trading station, perhaps to rule a tribe of fuzzy-vuzzles and assume the white man's burden of trying to get fanatic adherents of half-a-dozen creeds to dwell together in some semblance of harmony.

Will Study Fur Farming

Manitoba Provincial Government To Establish Demonstration Farm

A twenty-acre plot for the Manitoba Provincial Government Fur and Game Farm has been selected just a few miles west of Winnipeg. The farm will be under the direct charge of Dr. J. H. Allen, V.S., B.V.Sc., and will be for the purpose of studying the best methods of raising fur-bearing animals. Game birds will also be raised and Mongolian and ring-necked pheasants will be hatched and released upon reaching maturity. Mink, marten, fisher and fox will be stocked, and water enclosures will be built so that beaver, otter and muskrat can be propagated.

Might Lead To Confusion

A young barrister was conducting his first case. He was exceedingly nervous, and after he had proceeded with his speech for a few moments the judge interrupted suavely: "Mr. Blanke," he said, "so long as you consistently called the plaintiff, whose name is Jones, by the names of Smith, and defendant, Smith, by the name of Jones, the jury and I could follow you, but now that you have introduced the name of Brown without indicating whether you mean it to refer to the plaintiff or defendant, or to both, there is just the shadow of a possibility that we may shortly become confused."

Will Improve Oyster Business

On behalf of the oyster industry, it is easy to rejoice at the discovery that oysters cure anaemia. If this discovery reacts on the price of oysters in the same way in which a similar discovery a few years ago reacted on the price of liver, the oyster business will almost surely pull itself out of the depression during the season now about to begin.

Young Canadians Win Scholarships

Joining a list of 45 others at McGill University, three minor sons of employees of the Canadian Pacific Railway have just been awarded scholarships at McGill University, Montreal.

M. M. Madge

Mr. Madge, 18 years of age, is a son of Mr. Madge, station agent at Foster, Que., David K. Gowans, manager of hotels, Eastern Lines, and Keith W. Shaw, son of J. A. Shaw, consulting electrical engineer, Mosens, Madge and Gowans will study architecture while Mr. Shaw will follow a course in chemical engineering. All three remaining at the degree of bachelor.

D. K. Gowans

University till the degree of bachelor.

K. W. Shaw

Canadian Grown Prunes

Prunes Of Best Quality Now Grown On Vancouver Island

An agricultural development of some importance to the fruit growers of Vancouver Island is likely to result from experiments carried out at the Dominion Experimental Farm at Sidney, B.C. Prunes of the best quality, especially Italian prunes, have been successfully grown and dehydrated at the station, according to the superintendent, E. M. Straight, and should be able to supply the entire demand. Dried plums and prunes to the value of \$1,000,000 are annually imported into Canada.

Russia Making Gramophones

Soviet Russia is becoming "gramophone conscious." Until last year the few machines in Russia were imported. Then the government, realizing that the gramophone had its propaganda value the same as the radio, started a factory and turned out 6,000 sets. Now plans have been made to make 37,000 machines in 1931, and production of 25,000,000 records is another goal of the "five-year plan."

Poland expects to receive \$2,000,000 from its state lottery this year.

NEWEST MINISTERIAL APPOINTMENTS IN MOTHERLAND

Above are three of the many prominent political leaders, who have been given the remaining posts in the British Emergency Government. Left is Malcolm MacDonald, son of Premier Ramsay MacDonald, whose appointment as Under-Secretary of State for the Dominions is very popular. Top, right: Sir Philip Sassoon, wealthy Conservative friend of the Prince of Wales, who occupies the post of Under-Secretary of State for Air, and (below), Major Oliver Stanley, undoubtedly a coming leader in the Conservative stronghold, who will hold the position of Under-Secretary for the Home Office.

Pullman House-Keeping

Keeping House Awheel Requires Amazing Quantity Of Supplies Yearly

The affording of home comforts to overnight travellers has been developed to a high degree by the Pullman Company. Evolution of sleeping car services and facilities has kept step with the improvements in the art of our most faithful public servant—the railroad.

Keeping house awheel as the Pullman Company does is no small task and its many incidentals require annual supplies of amazing proportions. A circle of the Pullman Company stated that its purchases of supplies for one year alone included 98,738,000 sanitary drinking cups, 3,822,280 boxes of safety matches, 9,146,000 paper bags for hats and 4,115,900 cakes of soap.

No figures were cited as to the number of towels purchased each year to supply the actual and souvenir wants of travellers! Europe with a population of 480,000,000 has only 2,000 sleeping cars, while the United States with 122,000,000 has more than 3,000 cars whose rates are much cheaper per mile than in Europe.

Home Canning

Housewives Advised To Can Everything Possible For Winter Use

The Fruit Branch of the Dominion Department of Agriculture are giving special support to a Dominion-wide campaign to encourage housewives to can everything they can for winter use so that no surplus may be left to go to waste in field or garden. There never was such a time in Canada when there was such a crying need for relief or assistance in one form or another than at present, and the housewife, both in the rural and urban home, has a special opportunity to make use of the simple, practical and effective methods by which so much that would otherwise go to waste may be turned to the best of uses in the form of practical and appetizing relief.

Losers Love For Trains

After Many Years Man Complains About Them Feeding His Door

Richard W. Oldfield of Haverstraw, N.Y., listened to trains passing his house for twenty-two years. Then Mr. Oldfield decided it was time something was done about trains in general and the New York, Ontario & Western in particular.

So the village trustees are investigating Mr. Oldfield's complaints that the West Shore Railroad locomotives cause "considerable annoyance" by blowing whistles and puffing smoke.

His: "I understand your church has sent the minister to Michigan for a month."

Dix: "Yes, that's right."

His: "For a vacation, I suppose?"

Dix: "Yes; the congregation decided that we were entitled to one."

Drought Brings Distress

Two Hundred Thousand People Affected In Drought Areas

Throughout western Canada large numbers of people are in distress as the result of repeated crop failures and, although they are not included in a registration of unemployed, they probably total 200,000, Hon. G. D. Robertson, Minister of Labour, reports.

In a statement made on the number of unemployed in Canada, 150,000 in Saskatchewan drought areas were included as among those unemployed. Senator Robertson said it must be understood these people must be regarded differently from those who are unemployed, through the fluctuating fortunes of industrial and commercial activities.

Leaving aside those who are in difficulties from crop failures, the figures received at the department show that British Columbia has 38,881 registered unemployed; Alberta, 15,450; Saskatchewan, 26,904; Manitoba, 41,480; Ontario, 180,000; Quebec, 100,000; New Brunswick, 8,000; Nova Scotia, 18,000; Prince Edward Island, 1,500; a total of 380,223.

"As a result of the registration was carried out in Quebec, the figure for that province is estimated," Senator Robertson said. "New Brunswick indicates substantial increase by November, while Nova Scotia reports that in addition to the 18,000 unemployed, at least quite a number is working three days a week or less. The particular feature which I would like to make clear is that throughout the desolated drought areas, which exist in the three prairie provinces, and principally in Saskatchewan, there are roughly 200,000 people suffering severely because of repeated crop failures due to drought conditions, but it is not desired to represent the people in this area as being unemployed, because very many are taking advantage of every opportunity to struggle along to support themselves and dependents, and ought to be regarded differently from those who are unemployed through the fluctuating fortune of industrial and commercial activities."

Various causes contribute to indicate that registration, where fully carried out, is not wholly reliable, especially during the summer months, as was evidenced by the chief magistrate of one of our large industrial cities indicating alarm because of the largely increased number of unemployed therein, who found, and voluntarily announced a few days ago, that unemployment had substantially declined in that city on Sept. 1 because of the substantial number having returned to school who had been registered apparently during the holiday season. Evidence also exists that a number of transients roaming about the country have registered at more than one point."

Praise For Canadian Press

United States Publisher Refers To Opportunity For Promoting Friendly Relations

Responsibility of the press of Canada and the United States in promoting and fostering increasingly friendly relations between the two countries was stressed by Frank E. Gannett, publisher of 17 newspapers in New York, New Jersey and Connecticut, at the press day luncheon of the Canadian National Exhibition at Toronto. Mr. Gannett said he thought the newspapers of each country should cover the news of the other country more fully.

Mr. Gannett congratulated the Canadian publishers on the high standards they have maintained and the way in which they have handled news which may be socially harmful.

Advertising In North

Business In Barrens

The hand of modern advertising has moved northward, and on the great grey rocks of old Prince of Wales a brightly lithographed sign reads "Eat so and so chocolates." A Saskatoon commercial traveller placed the sign on the old fort.

The chocolate bar salesman put in a big day. "The Eskimos are eating our bars," he said.

"They're worth 25 cents in trade up in the barrens. To a barren land trader 20 chocolate bars were recently sold and in Churchill the chocolate bars are popular."

"If I were trying to match politeness," explained the ampy customer, "I should have a difficult job here."

"Let me see your sample, madam," said the shop assistant calmly.

Tests made by scientists prove that colour effects are as follows: Red and orange stimulate, deep yellow cheers, green has a soothing effect and white induces irritation.

The Thousand Islands really number 1,692.

Plethora Of World's Goods

Suffering and Privation In The Midst Of Plenty

While the world is tightening up its belt in preparation for the coming winter, it is not for lack of plenty of good things in the world. Of staple commodities there are ample for all—tea, sugar, coffee, tin, copper, rubber and wheat.

There are 5,600,000,000 bushels of unsold wheat in the world, enough to supply bread to the nations for two years.

There are 6,000,000 tons of unsold sugar. To liquidate this surplus every human being in the world would have to consume an extra pound of sugar a month for a year.

This year's production of coffee is 26,000,000 bags or twice as much as the world's consumption. The Brazilian Government imposes an export tax of \$2.50 on each bag of coffee. This money is used to purchase surplus coffee for destruction. In one week of last month 676,000 bags of coffee were so destroyed.

Present stocks of tea in Britain alone amount to 225,000,000 pounds. To reduce this, every man, woman and child would have to consume an extra two pounds of tea during the coming year.

The cotton crop is estimated at 28,000,000 bales, which with stocks on hand means a surplus of 12,000,000 bales over present needs.

Every woman in the world could have two summer frocks out of the surplus cotton. Surplus rubber stocks increased by 130,000 tons last year; unsold copper stocks by 96,000 tons and surplus tin by 32,000 tons.

Yet the fault is not over-production, as it may seem. Economists lay the blame at the door of restricted currency, disordered world economy, based on falling profits, the burden of national debt and taxation, unequal distribution of wealth. Hope lies in debt cancellation and the removal of the incubus of fear.—Regina Daily Star.

Churchill Called Paradise For Tourists

Statement Made By U.S. President Of Canadian Tourist Association

Paradise for the sportsman and tourist lies in the Hudson Bay Territory where fish and wild life abound, declared John Hooper, first bona-fide United States tourist to visit Churchill, accompanied by Prof. S. G. Pettingill of Carnegie Museum Expedition. Mr. Hooper has completed a trip to Manitoba's northern seaport. He is the president of the Canadian Tourist Association.

"We saw 27 white whale, from 12 to 18 feet long in Churchill harbor. These whales make great soap factories, stock and when refined will make good machinery oil," Mr. Hooper said. Sturgeon 100 and 125 pounds in weight were offered for sale for 50 cents each by Indians and trappers. "As there is no refrigeration plant at those points, and as the law prohibits exports, I am told they cannot ship this fish out," the visitor stated.

The first of the Hudson's Bay Company shipments of last season's furs were shipped out while Mr. Hooper was in the northern port. The pack consisted of more than 2,000 prime Arctic white foxes, numbers of silver fox, black fox and cross fox pelts rare sables and martens. "For the hunter there is all the Caribou, walrus and seal around Churchill that anyone could wish for," he said.

Mr. Hooper believed the seaport of Churchill had opened a great vista of new steamship routes. Ships would ply from Boston, New York and Halifax, Quebec and Montreal taking tourists to Churchill. Then they would proceed by rail to all points of the west. He hoped facilities would soon be installed at Churchill for the tourists and that the government would erect hotels.

"Have you ever had a lesson by correspondence?"

He: "You bet! I never write to women now."

Railways of Cuba are reducing passenger fares.

"Why do you give your dog so little to eat?"

"To make a greynound of him." — Lustige Koller-Zeitung, Cologne.

ENO'S FRUIT SALT

To Feel Your Best

Take a dash of ENO'S "Fruit Salt" in a glass of water every morning. Millions do this daily because they know that ENO—gentle, effective, non-habit-forming—is the deadly foe of constipation.

In cases of acid stomach, fatigue, biliousness—ENO is invaluable. For more than sixty years it has been the standby in thousands of well-regulated homes.

But remember, only ENO can give ENO results.

THE HOUSE OF DREAMS-COME-TRUE

MARGARET PEDLER

It's a strange road leads to the House of Dreams, To the House of Dreams-Come-True. Its hills are steep and its valleys deep, And sit, with tears the Wayfarers weep, The Wayfarers—I and you.

But there's sure a way to the House of Dreams, To the House of Dreams-Come-True. We shall find it yet, ere the sun has set, If we fare straight on, come fine, come wet, Wayfarers—I and you.

—Margaret Pedler.

CHAPTER I.

The Wander-Fever

The great spaces of the hall seemed to slope away into impenetrable gloom; velvet darkness deepening imperceptibly into sable density of panelled wall; huge, smoke-blackened beams, stretching wide arms across the roof, showing only as a dim lattice-work of shadow, fretting the shadowy twilight overhead.

At the furthest end, like a giant golden eye winking sleepily through the dark, smouldered a fire of logs, and near this, in the luminous circle of its warmth, a man and woman were seated at a table lit by tall wax candles in branched candelsticks. With its twinkling points of light, and the fire's red glow quivering across its shining surface, the table gleamed out like a jewel in a sombre setting—a vivid splash of light in the grey immensity of dusk-enfolded hall.

Dinner was evanescent, fading for the candlelight shone softly on satin-skinned fruit, while wonderful gold-veined glass flecked the dark pool of polished mahogany with delicate lines and ripples of opalescent colour.

A silence had fallen on the two who had been dining. They had been gay enough together throughout the course of the meal, but now that the servants had brought coffee and withdrawn, it seemed as though the stillness—that queer, ghostly, memory-haunted stillness which lurks in the dim, disused recesses of a place—had crept out from the four corners of the hall and were stealing upon them, little by little, as the tide encroaches on the shore, till it had lapped them around in a curious atmosphere of oppression.

The woman acknowledged it by a twist of her slim shoulders. She was quite young—not more than twenty—and as she glanced half-enquiringly at the man seated opposite her there was sufficiency of likeness between the two to warrant the assumption that they were father and daughter.

CORNS LIFT OFF

Pain Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any drugstore for 35c.

PUTNAM'S

W. N. U. 1907

THE HOUSE OF DREAMS - COME - TRUE

BY MARGARET PEDLER

A THRILLING NEW SERIAL

From the great castle of Belnecels, the House-of-Dreams-Come-True, into a world of bitterness and strife and love, went Jean Peterson. Thrilled by a magic day at Montavan, spent with a man of mystery, she was brought face to face with the realization that she loved him—hopelessly.

Tragedy, misery, vengeance dogged the heels of this beautiful love-child the moment she set foot on the shores of England. Disillusioned, broken-hearted, she returned to her castle of shattered Dreams only in time to see it, too, come tumbling down before her eyes, swept by the waves of fate. But in its place there rose a greater, a more enduring castle—the castle of love—the House-of-Dreams-Come-True.

every shade of his constant changes of mood.

"There's no sense of adventure about England," he said shortly. "It's a dull corner of the world—bristling with the proprieties."

Jean realised how very completely, from his own point of view, he had answered her. Romance, beauty, the sheer delight of utter freedom from the conventions were as the breath of his nostrils to Glyn Peterson.

Born to the purple, as it were, of an old English county family, he had stifled in the conventional atmosphere of his upbringing. There had been moments of wild rebellion, bitter outbursts against the established order of things, but these had been sedulously checked and discouraged by his father, a man of iron will, who took himself and his position intensely seriously.

Ultimately, Glyn had come to accept of no more or less philosophy than the fact of his heirship to old estates and old traditions, with their inevitable responsibilities and claims, and he was just preparing to fulfil his parents' wishes by marrying, suitably and conventionally, when Jacqueline Mayroy, the beautiful half-French opera singer, had flashed into his horizon.

In a moment the world was transformed. Artist soul called to the soul; the romantic vein in the man, so long checked and thwarted, suddenly asserted itself irresistibly, and the very day before that appointed for his wedding, he and Jacqueline ran away together in search of happiness.

And they had found it. The "County" had been shocked; Glyn's father, unbending descendant of the old Scottish Covenanters, his whole creed outraged, had broken under the blow; but the runaway lovers had found what they sought.

At Belnecels, a beautiful old schloss on the eastern border of Austria, remote from the world and surrounded by forest-clad hills, Glyn Peterson and Jacqueline had lived a romantically happy existence, roaming the

So Nervous She Could Scream

These Hysterical Womenfolk

CRYING... sobbing... laughing... in a fit of nervousness... the breaking point. What a state to be in! Constant headache, bearing down pains, dizzy spells are robbing her of health and beauty.

Saskatchewan Unemployed

26,094 Registered Unemployed Persons in Urban Centres

The number of registered unemployed persons in the urban centres of Saskatchewan, not including dependents, totals 26,094, according to figures released by Hon. J. A. Merkle, Minister of Railways, Labour and Industries.

These figures include 8,237 married men, 4,851 single men, and 932 single women in the cities, and a total of 12,074 unemployed persons in the towns and villages where no government registration offices are in operation. Regina has a total of 1,290 unemployed.

These figures were obtained at the conclusion of registration efforts that were undertaken by the provincial government officials, in keeping with a request made by the Federal Government for statistics dealing with unemployment. The figures were wired to Ottawa by Mr. Merkle.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Professor Loses His Bugs

Entomologist of Illinois University Robbed Of Valuable Collection Professor John S. Dole has lost his bugs.

For six weeks, the professor, who is an entomologist at the University of Illinois at Urbana, had been touring several states by automobile with his wife, looking for ants, bees, dragon flies, earwigs, spiders and other insects. About 1,000 of them were collected and placed in a suit case.

Then the professor and his wife drove into Chicago, parked their car on the street, and went away for a few hours. When they returned the professor's bugs were gone. Someone had stolen them.

Policeman—"You'll have to move this car." Bystander—"I don't think so." "You don't, hey? Why not?" "Because it isn't my car."

The Editorial Page

Has Changed For the Better In Last Few Years

There have been many discussions as to what is the most popular section of a daily newspaper, but strangely enough the editorial page is frequently mentioned in the list. Once the only people who read editorials were of a stern cast, who were determined to do their duty to their country no matter what the cost. Although there were brilliant editorial writers fifty years ago, the general style and subject matter was not the type to attract the weary business man wishing mental relaxation. In fact, preparatory to perusing this section of the family journal, it was customary to don heavy silver-rimmed spectacles, and sitting very straight in a high-backed chair assume a lofty and solemn attitude. Today, like most other things, the editorial page has vastly changed. No longer are its readers confined to the distinctly serious-minded. It has come to have a much wider scope. No longer does the average editor strive for a lofty ponderous style that was the acme of excellence in the days of the leg-of-mutton allele. He realizes that there is a vast difference in the people whom he wishes to interest and adjusts his material accordingly.

Alberta Homesteads Homestead entries in Alberta for the month of July numbered 1,114, more than half of which were taken out through the Edmonton land office. Of the total for the month, 331 entries were made by women, this being the first occasion in which the new law enabling women to homestead has been in operation.

A physiologist states that being a trifle overweight is rather a health advantage to people under 35 years of age, but beyond that age being overweight is a liability.

Crude weighing machines based on the balance were used in Egypt at least 5,000 years before the Christian Era.

Little Helps For This Week

"Changed into the same image from glory to glory."—2 Corinthians III. 18.

As one lamp lights another, nor grows less. So nobleness enkindles nobleness."—James Russell Lowell.

In a very simple and literal way he believed that God was His Father, not in name only, but in very truth. He knew that he, in common with every human being, had it in his power to live as a son or as an alien; and he knew—that that most sure proof, the experience of daily life—that he could only overcome the cravings of selfishness by a constant effort to come in to closer union with the life-giving spirit to whom he was truly akin, that so he might not starve, but grow and develop.—Knight-Errent.

Counting the big game in state forests and parks once took a force of men several weeks; now it can be done in a few hours by two men in a plane.

Butter and meat production in New Zealand are breaking all records.

Cross to the Old Country for CHRISTMAS

That trip you've decided to take next year, or even the year after, can be a reality this Christmas. The money you have set aside is enough now! The fare on the fast Canadian Pacific palaceships is radically reduced but accommodation and meals are of the same quality that has made Canadian Pacific famous the world over.

Cost of living in the Old Country is less than it was. Ships sail regularly and frequently during October and November.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed. The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line. Legal advertising, 15c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00. The advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Heard Around Town

Miss Marjorie Lee assisted in the Acadia Produce store last Saturday.

Mrs. Gertrude Thompson leaves this week for a short visit at Angus, Minnesota.

M. L. Chapman was at Coutts last Friday, bringing a load of crude oil for Cooley's garage.

Weather this last week has been cool and showery. There was frost on Sunday night which froze potato vines in the gardens.

Heathdale school re opened on Monday, 7th September, with Miss Audrey Neff in charge. Miss Neff taught this school last year.

Donald Guss, the ten year old son of Mrs. Guss, had the misfortune to fall from the swing at the school playgrounds last Friday, breaking his arm.

J. C. Turple, who finished his threshing operations some little time ago, had a yield of 12 bushels to the acre on summerfall and of six bushels on stubble.

Mr. Reid, chief engineer of the provincial road gang, has rented the Messey house in town and was joined on Tuesday by Mrs. Reid, who came in from Hanna.

Mr. and Mrs. Harry Johnstone, of Cereal, are being congratulated on the birth of a daughter (Amber Harriet) on September 11. The little new arrival boasted of two teeth when born.

The Ladies' Card Club met last Tuesday evening at the home of Mrs. Lloyd Robinson. Mrs. Vanhook and Mrs. J. Cooley shared the honors. The club meets next week at the home of Mrs. Peter Peterson.

Mesdames Rideout, Jacques and Thompson arrived home from Calgary Friday evening. Some car trouble developed near Hanna, which caused Mrs. Rideout and the other two ladies to come the rest of the way with Mrs. Johnstone and Mrs. Gillespie of Oyen.

A meeting of the Chautauqua committee was held Monday evening in the Cooley garage. Mr. Robinson was appointed chairman and Mr. Rideout secretary. Ticket and advertising committees were appointed. The dates for Chautauqua this year are October 6, 7, 8 and 9.

The rain on Monday, while holding up cutting and threshing of grain, did not soak in enough to stop field work for long. We generally get some stormy weather at this time of the year, the equinoctial period, but will likely get a return of the good weather soon. There are very few farmers this year using engines on their combines, doing all field work as cheaply as they can. Binders with header attachments are being used quite largely. Threshing is about one quarter finished.

Early Autumn Wedding

At 8 o'clock on Wednesday evening, Sept. 9, against a colorful background of dahlias and asters, the marriage was solemnized of Audrey Eugene Jaynes, daughter of Mrs. T. S. Worden of Montreal and the late Mr. L. S. G. Van Wart, of Calgary, and Dr. Roy Clarence Thorpe, youngest son of Mr. and Mrs. B. J. Thorpe, of Calgary, the Rev. Dr. George W. Kerby officiating at the ceremony.

The marriage took place in the home of the bride's aunt, Mrs. Austin de B. Winter, where the rooms, a bower of flowers, formed a charming setting for the event.

The bride, who was given in marriage, by her uncle, Mr. Austin de B. Winter, wore a white gown of crepe back satin, made with a fitted bodice finished with narrow diagonal tucking to the neckline, which was accentuated by a narrow belt across the back. The skirt flared to floor length, godets adding to the full circular effect. A brief jacket of the same material trimmed with diagonal tucks and having elbow length sleeves finished with wide bands of white fox fur, added a smart and unusual touch to the bridal attire. Her headress was a bandeau of white pleated georgette, backed with white velvet pousies and orange blossoms. She wore long gloves and white satin slippers and carried a shower bouquet of sweet heart roses and sweetpeas.

Miss Ruth and Miss Doris Van Wart, sisters of the bride, were her only attendants. Their frocks, of similar design, were fashioned of cañon crepe, the former's being of rose beige and the latter's of powder blue. Made with fitted bodices and flaring to floor length from a high neckline, with yokes of ecru lace, and flaring bolero jackets made with long sleeves and trimmed with pin tucks, the bridesmaids' dresses produced a charming effect. Their hats were Eugenic models of transparent velvet to match their frocks, with feather trimming in a blonde shade, which blended with the tone of their slippers. They carried quaint colonial bouquets of sunset roses and pansies bordered with a wide frill of ecru tulle.

Mr. Vincent J. Downey supported the bridegroom as best man, Mrs. Reginald Hayden played the wedding march, and during the signing of the register Miss Helen Swanson sang "Because." Following the ceremony

the bridal party received the guests assisted by Mrs. Austin de B. Winter, who wore a smart frock of pancy colored crepe with a velvet coat and a corsage of tea roses, and Mrs. B. J. Thorpe, the mother of the bridegroom, who chose for the occasion a black and grey crepe dress, with which she wore a black hat. Her corsage was of deep red roses.

Presiding at the bride's table, which was centred with a three-tier wedding cake offset with flowers, were Mrs. J. Vair Anderson and Mrs. H. E. Bullis. Those assisting in serving were: Miss Mickey Van Wart, sister of the bride, Mrs. Clinton Adams, Mrs. Gordon Ross, Miss Adele Ross and Miss Thelma Tombs.

After the reception Dr. and Mrs. Thorpe left by motor on their honeymoon, which will be spent in Spokane and the coastal cities. The bride chose for travelling a green and fawn figured dress. Her black coat had a fawn fur collar and her hat and accessories were also in a fawn tone.—Calgary Herald.

Dr. Thorpe is a brother of Mrs. E. E. Jacques of Chinook.

Something New In Winter Cruises

Something new in the way of a holiday trip this early winter for residents of the prairie provinces and Pacific Coast is a 23-day cruise from Vancouver to Halifax via the Panama Canal on the Canadian National steamship Prince Henry.

An interesting itinerary has been laid out for the trip. The ship will sail November 21 and will first call at Victoria and make her next stop at San Francisco. From there calls will be made at San Pedro, Manzanillo, Balboa, Cristobal, Havana, Bermuda and Halifax, arriving at the latter port December 13. There has been much speculation on the coast as to what use would be made of the Canadian National flag ship following the completion of her summer Alaskan schedule. The announcement of this cruise coming just at a time when the passengers can arrive at their eastern destination nicely before Christmas already has created interest, and many trippers from the Pacific Coast and the prairies have already made application for space.

"Is your wife economical?" "Sometimes. She had only twenty-six candles on her fortieth birthday cake last night."

Here and There

Commercial fruit production in Canada in 1930 had a value of \$19,224,576. Apples accounted for \$10,821,940 of that total.

For the year ended May 31, 1930, a total of \$2,037,678 was spent in Canada for cut blooms showing that Canadians still have a strong penchant for anything in flowers.

As a barometer of business conditions in Nova Scotia it may be stated that in 1930 there were 129 new companies incorporated as compared with 118 for the previous year.

A consignment of 120,000 pounds of dried hake from Dickey has been shipped by way of Yarmouth to Rio de Janeiro, Brazil, and Nova Scotian exporters believe this may be the beginning of a steady trade in this line.

Over fifty per cent. of the raw leaf tobacco used in the Canadian tobacco industry is now produced in Canada. Less than two per cent. of the tobacco consumed in the Dominion is imported in manufactured form.

At end of February 7,621,980 head of wheat had entered Saint John over Canadian Pacific lines as compared with a movement of 2,650,677 bushels during the similar period of 1930.

Two Chinese babies hold the distinction of being the first infants born aboard Canadian Pacific liner Empress of Japan. The births occurred on a recent voyage and were reported on arrival of the ship at Vancouver.

Public rooms on the Empress of Britain which will arrive at Quebec on its maiden voyage June 2, all bear distinctive names. The dining saloon will be known as "Salle Jacques Cartier," the ball room as the "Empress Room," and the lounge as "Mayfair."

Total estimated revenues of the province of New Brunswick for 1931 is set at \$4,302,821 according to the financial estimates presented in the provincial legislature recently by the provincial secretary-treasurer in his sixth budget speech.

When H. R. H. the Prince of Wales opens the British Trade Fair at Buenos Aires, March 14, his address will be broadcast throughout Canada by the combined efforts of the Canadian Pacific and Canadian National companies. The broadcast will start about one p.m. Eastern Standard Time and will last between 20 and 30 minutes.

Inauguration of air service between Saint John and Halifax occurred recently when a Fairchild plane of the Canadian Airways left the New Brunswick city with passengers and express for the Nova Scotia metropolis. The trip of 125 miles was made in an hour and a half.

"In most parts of western Canada if you ask a business man as to general conditions in his locality, the answer you receive is a surprise number of instances is that they are better than people in the east seem to think and that signs of improvement are by no means wanting," was the summary of impressions of his just concluded western tour by E. W. Beatty, chairman and president of the Canadian Pacific Railway.

In reporting the wheat crop of J. C. Turple last week our correspondent stated that on summer fallow the crop was 9 1/2 bush. This should have been 12 bush and the stubble 6.

Boats Ready For Test Cargo

Bound for Churchill, seaport of the prairies, to send off the first test shipment of wheat over the Hudson Bay route, two Canadian government officials arrived at The Pas Saturday. By Sunday night they will be at the northern Manitoba harbor, where two boats are ready to be loaded for the trans-Atlantic journey.

Col. A. E. Dubuc, chief engineer of the Dominion department of railways and canals, and D. W. McLachlin, engineer in charge of Churchill development, are en route to inspect the port's new 2,500,000 bushel grain elevator, and to view the progress of dock construction.

It is expected they will remain in Churchill until Thursday before returning to Ottawa.

The steamer Farnworth, which reached Churchill after a 13 day voyage from Newcastle-on-Tyne, England, is expected to take out the first cargo. It will be followed by the Warkworth which completed a 10 day trip from Montreal. Together the two boats will carry over-eas about 500,000 bushels of Saskatchewan grain.

No haste will be shown in loading the two vessels. It is stated that the Churchill elevator, designed as the second fastest grain handling establishment in the world, could load each boat within a day. However, special care is to be taken in trimming the cargoes to obviate possibility of the wheat shifting enroute.

The Farnworth and Warkworth, of about 7,000 tons capacity each, will be loaded to the hatches with the wheat, property of the Canadian wheat pool. For three weeks trains of grain cars have been rolling through The Pas, north-bound along the 5 1/2 mile Hudson Bay Railway to Churchill.

A striking relic of the old Comstock days was unearthed at Virginia City by Albert Dressel of Berkeley, a souvenir hunter, when he found an imitation glass cigar five feet long that was used to advertise a famous cigar store 50 years ago. The device, forerunner of modern electric signs, was lighted with gas and is constructed of 10,000 to 20,000 glass prisms.

Showman—"And now, ladies and gents, there's this 'ere halligator." Note the length. Fifteen feet from the tip of the nose to the tip of the tail, and fifteen feet from the tip of the tail to the tip of the nose—thirty feet in all."

A hen that sits on kittens instead of eggs, or chickens, is owned by Mrs. William Danielson, of Fergus Falls, Minn. The hen has mothered the kittens for the past three weeks it is reported, and the kittens seem to enjoy their fosterparent.
